Reciprocity Spatial Mapping and Time Reversal in

January 4th, 2019 - The use of time reversal in addition to spatial mapping yields additional useful results such as the mapping of ray paths not immediately evident from the generalized Lorentz reciprocity

Reciprocity Spatial Mapping and Time Reversal in

January 8th, 2019 - The reverse linkage between Lorentz reciprocity and reciprocity in k space had already been found However this was the first time that the results were presented in a systematic and mathematically well defined procedure to serve as a tool for solving problems of reciprocity and scattering symmetries The use of time reversal gives rise to problems of causality when sources are present but when the interaction between two systems is involved the non causal effects are irrelevant
